

## Hold Harmless Waiver – Non-Operable Vehicles

I have been advised that the vehicle I wish to ship through Bimini Shipping has been classified as “non-operable” due to the following conditions (please check all that apply):

- Cracked or damaged windshields or windows
- Flat, missing or damaged tires or wheels
- Leaking fluids
- Deployed airbags
- Non-functioning brakes
- Unable to stay running under its own power source
- Out of fuel/gas
- Other- Please describe \_\_\_\_\_

I understand that vehicles in the above conditions cannot be driven safely by Bimini Shipping employees and must be mechanically lifted directly into a container. I have also been advised that an additional fee will be charged for this service:

- Motor Vehicle/Rolling Stock up to 700 cft : \$100.00 each
- Motor Vehicle/Rolling Stock greater than 700 cft : \$390.00 each

Reasonable effort will be made to load vehicles under this classification with care; however Bimini Shipping is not liable for damage that may result from mechanically lifting the vehicle.

I agree to indemnify and hold harmless Bimini Shipping from and against all claims, loss, damage and expenses stemming from the aforementioned operations.

I further to agree to pay Bimini Shipping for any damage done to any Bimini Shipping equipment or property including, but not limited to the containers involved. I agree that any such charges may be invoiced on the Bill of Lading applicable to the ocean carriage of the involved cargo.
